ABOUT

At Vulcan-Vulcap Industries Inc. we design and manufacture tire repair products and solutions while specializing on vulcanizing equipment of the highest quality.

Our goal is to help your tire repair business operate efficiently and profitably by reducing your down time as well as your new tire expenditure, the more tires you repair the less you'll spend.

Canadian owned since 1956, Vulcan Equipment Company was founded by Erhard J. Alm who changed the tire repair industry with a revolutionary concept in tire vulcanization. He invented the first portable, electric mold for passenger and commercial tires.

The Vulcan MPB Passenger Section Repair Mold cut curing time from 90 to 30 minutes, requiring minimum electricity and was mass produced at a price that enthused tire repair and retread shops around the world.

Today with over 10,000 machines sold, Vulcan-Vulcap Industries Inc. still supplies parts for these molds as well as manufacturing a new generation of Section Repair Mold Systems and Vulcaflex Portable Repair Systems for truck and OTR tires. For tires ranging from truck tires to 63" (Giant) OTR tires.

Vulcan-Vulcap Industries also manufactures a wide range of tire repair and retread accessories for truck and OTR Equipment.

Our commitment to provide "leading edge equipment" paired with advanced R&D as we maintain rigorous testing and evaluation.

VULCAN-VULCAP Section Repair Mold Systems are engineered to accurately repair all tire sizes from the smallest passenger tire or truck, tractor, or skidder tire up to a 57" OTR (Earthmover Tire).

They offer measurable precision you can count on, with accurate time control, adjustable temperature, and pressure ensuring optimal vulcanization results.

Flowing rubber during the curing process densely seals any repaired injury, providing a permanent and leak-free repair. The combined pressure and heat offer maximum adhesion, curing simultaneously plug and patch.

- Permanent outside air bag & heat pad
- Expandable cavity makes it easy to load
- Built-in automatic air differential control
- Air differential (control 45 P.S.I.)
- Available in electric or steam configuration
- 220V single phase
- Warranty of 400 curing hours on parts and heat pads
- Made in Canada

V14 SYSTEM

V14 Section Repair Mold System
For Radial and Bias Truck Tires
Tire size 8.25R15 to 12.00x24
Repairs up-to 4" injury for Bias tire without distortion
Repairs up-to 18 cables on Radial tire without distortion
Up-to 14" x 14" patch (35.5 cm x 35.5 cm)

MV20

MV20 Section Repair Mold System
For Radial and Bias Tractor, Skidder and
Road Grader Tires
Tire size 14.00R24/25 to 18.00 x 24/25
Repairs up-to 10" injury for Bias
Repairs up-to 20 cables on Radial tire
Up-to 20" x 20" patch (50.8 cm x 50.8 cm)

MV30

MV30 Section Repair Mold System for Radial & Bias
Tractor, skidder, and Road Grader Tires
Tire size 20.5R25 to 24.00 x35
Optional top clamp extension allows handling of large
tires (29.5R 25/29)
Repairs up-to 12" injury for Bias tires
Repairs up to 20 cables on Radial tire
Up to 24" x 24" patch (61 cm x 61cm)

MV40

MV40 Section Repair Mold System For
OTR tire size 27.00R49 to 37.5 x51 Repairs
up-to 12" injury on Bias tires
Up-to 18 cables on Radial tire
Up to 24" x 24" patch (61 cm x 61cm)

V14 SYSTEM

MV20 Section Repair Mold System
For OTR Tires size 36.00R51 to 54.5/80R57
Repairs up-to 12" injury for Bias tire
Repairs up-to 15 cables on Radial tire
Up-to 24" x 24" patch (91cm x 91cm)
